## REFRIGERATION

### New Designer Handle Bosses

**MARKETS:** NZ, AU, ROW, UK, EU, TW  
**MODELS:** E450, E388, E522B, E442B, E402B

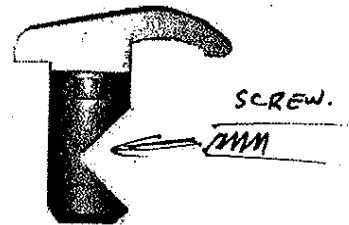

A new designer handle boss has been introduced to improve overall handle fitment and the rigidity of the assembly, which will in turn stop handles breaking off in service due to hooks failing.

It is recommended that the old bosses, part number 814816, are not used and should be replaced by the new boss, part number 837182P.

**Old Handle Boss**

#### Fitment of new boss.

The two bosses are fitted into the slot with the longer section of the boss pointing to the top of the door.

- Slide the longer section of the boss into the slot first
- Push the boss down into the door
- Slide the boss backward into the other end of the slot.
